Introdução

Obter o código de um repositório online, como o GitHub ou o Azure DevOps

Abrir um projeto local do Visual Studio ou arquivo .sln

Navegar e editar o código dentro de qualquer pasta

Criar um projeto

Escolha um modelo de projeto com scaffolding de código para começar

Continuar sem código →

Criar um novo projeto

MeuSiteMVC Home Privacy

Welcome

Learn about building Web apps with ASP.NET Core.

A classe **HomeController** possui 3 métodos!

```
app.UseEndpoints(endpoints =>
{
    endpoints.MapControllerRoute(
        name: "default",
        pattern: "{controller=Home}/{action=Index}/{id?}");
});
```

```
namespace MeuSiteMVC Controllers
     0 referências
     public class HomeController: Controller
         0 referências
         public IActionResult Index()
             return View();
         0 referências
         public IActionResult Privacy()
             return View();
         [ResponseCache(Duration = 0, Location = ResponseCacheLocation.None, NoStore = true)]
         0 referências
         public IActionResult Error()
             return View(new ErrorViewModel { RequestId = Activity.Current?.Id ?? HttpContext.TraceIdentifier });
```

```
</header>
31
           <div class="container">
32
               <main role="main" class="pb-3">
33
      □ :
                🛑 @RenderBody()
34
               </main>
35
           </div>
36
37
           <footer class="border-top footer text-muted">
38
               <div class="container">
39
                   © 2024 - NeuSiteMVC - <a asp-area="" asp-control</pre>
40
```

Todas as páginas que forem carregadas (lá da view) vão ser renderezidas aqui!

```
| cheader>

```

Meu Primeiro Site em MVC Inicio Privacidade

Welcome

Learn about building Web apps with ASP.NET Core.

Agora vamos dar uma olhada nas controllers. Para isso agora, pare o projeto se estiver em execução!

Vamos criar uma nova model

Digite prop e aperte a tecla tab duas vezes.

```
0 referências
public IActionResult Index()
    HomeModel home = new HomeModel();
    home.Nome = "Prof. Anderson Vanin";
    home.Email = "anderson@email.com";
    return View(home);
0 referências
```

Meu Primeiro Site em MVC Inicio Privacidade

Bem vindo, Prof. Anderson Vanin

Meu Primeiro Site em MVC

Seu email é: anderson@email.com

Subindo o projeto para o Github

Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere? <u>Import a repository.</u>

Required fields are marked with an asterisk (*).

Great repository names are short and memorable. Need inspiration? How about fluffy-system?

Initialize this repository with:

Add .gitignore .gitignore template: None •

Set up in Desktop or HTTPS SSH

https://github.com/ProfAndersonVanin/SiteMVC_2024.git

Get started by <u>creating a new file</u> or <u>uploading an existing file</u>. We recommend every repository include a <u>README</u>, <u>LICENSE</u>, and <u>.gitignore</u>.

...or create a new repository on the command line

```
echo "# SiteMVC_2024" >> README.md
git init
git add README.md
git commit -m "first commit"
git branch -M main
git remote add origin https://github.com/ProfAndersonVanin/SiteMVC_2024.git
git push -u origin main
```

...or push an existing repository from the command line

```
git remote add origin https://github.com/ProfAndersonVanin/SiteMVC_2024.git git branch -M main git push -u origin main
```

```
Digite 'get-help NuGet' para ver todos os comandos disponíveis do NuGet.

PM> git init
